Starting Up

1. Set up your Sega Saturn system as described in its instruction manual. Plug in Control Pad 1. For two-player games, plug in Control Pad 2.

Note: *Toshinden URA™* is for one or two players.

2. Place the *Toshinden URA* disc label side up, in the well of the CD tray and close the lid.
3. Turn on the TV or monitor and the Sega Saturn. The Sega Saturn logo appears on screen. If nothing appears, turn the system off and make sure it is set up correctly before turning it on again.
4. If you wish to stop a game in progress and return to the on-screen Control panel, simultaneously press Buttons A, B, C and Start on the Sega Saturn Control Pad. When the game Title screen appears press A, B, C and Start again to go to the on-screen Control panel.

Important: Your Sega Saturn CD contains a security code that allows the disc to be read. Be sure to keep the disc clean and handle it carefully. If your Sega Saturn system has trouble reading the disc, remove the disc and wipe it carefully, starting from the center of the disc and wiping straight out toward the edge.

The Toshinden Tournament is over. Through the battles some of the fighters have uncovered much about the shadowy events surrounding their lives. But the others now head home with little more than a few bruises and unfulfilled dreams. None of them, however, are aware that a new battle is about to begin.

Throughout the world, martial arts experts are disappearing. Police from various nations are cooperating in an international manhunt to find the criminal responsible for the murders. Yet no motive has been established, and there is little evidence available. A wave of terror has struck the world, and now even the strongest and bravest of fighters are not safe.

The former contestants of the Toshinden Tournament find themselves in a world gone mad. It is not inconceivable that one of them is responsible for the current chaos. But who is behind the disappearances, and for what purpose? All of the fighters came to the Toshinden Tournament for different reasons, but they are all fighting for the same reason now: SURVIVAL.

Getting Started

After the Sega™ and Takara™ logos, the *Toshinden URA* intro begins. Watch the characters in action and then access the Title screen, or skip the intro and go directly to the Title screen by pressing Start. Press Start from the Title screen to bring up the Mode Select screen.

On the Mode Select screen, select one of the battle modes or access the game Options. Press the D-Pad UP or DOWN to highlight, and Start or Button A or C to select.

1P Game

The way to win in this mode is pretty simple: don't lose a match. The more opponents you defeat, the closer you'll get to the final showdown.

VS Human

One match determines the winner in this two-player fighting mode.

VS Computer

Try a little training with the character of your choice. You also get to select your computer-controlled opponent.

Options

Change the settings for selected features of the game.

Battle Modes

1P Game

One by one your opponents come at you with a single goal in mind, to knock you out of the tournament. After all, you're in their way on the path to the final showdown. Guess that's just too bad for them, because they're in your way too.

Choose your fighter from the Player Select screen. Press the D-Pad LEFT or RIGHT to highlight a fighter, then Button A, B, C, X or Y to select. The computer then selects your first opponent.

Should you lose a match you can still

keep going. To continue, press Start before the countdown reaches zero. There is no limit to the number of times you can continue your game.

VS Human

Players select fighters at the same time on the Player Select screen. Press the D-Pad LEFT or RIGHT to highlight, then Start or Button A, B, C, X or Y to select. If desired, both players can select the same fighter.

Note: Your fighter's appearance depends on the button you press to select him/her.

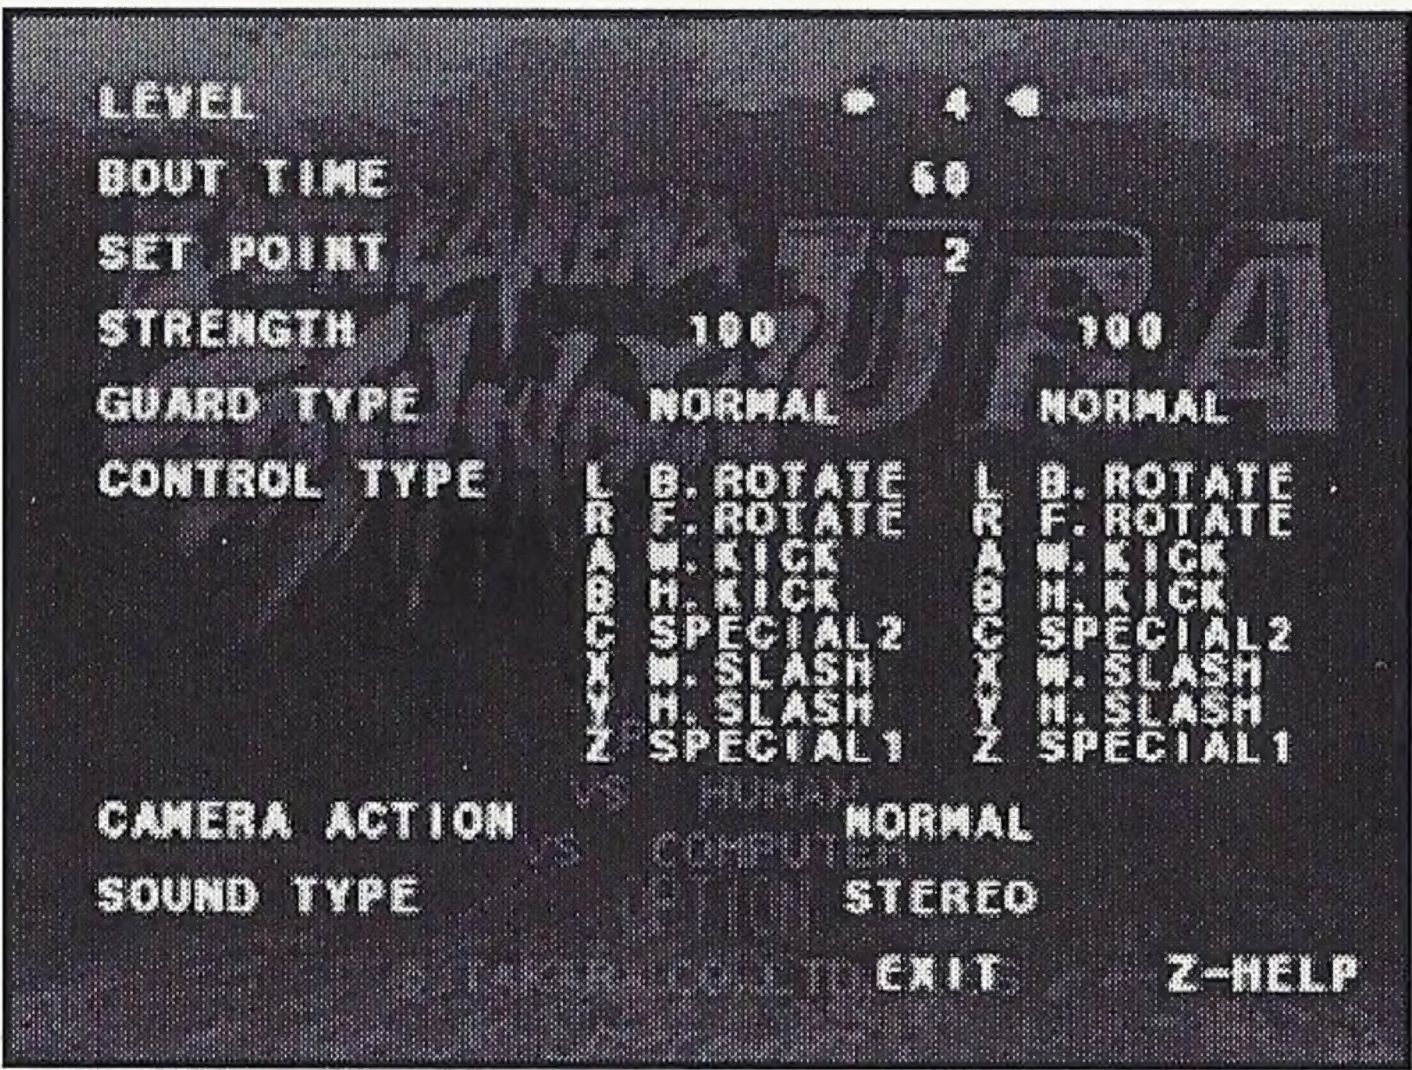

After the fight, a screen appears showing the breakdown of wins, losses, total number of times played for all fighters, and who controlled them (either Player 1 or 2). Press Start or Button C to return to the Player Select screen. Press Start and Buttons A, B and C at the same time to return to the Title screen.

LEVEL (1-8)

Set the skill level for computer-controlled opponents. The higher the number, the more talented your opponent.

BOUT TIME (0, 60, 99)

Select the length (in seconds) for the round.

SET POINT (1-3)

Use this feature to set the number of rounds needed to win the match.

STRENGTH (50-120)

The higher the number, the less damage your character takes when hit. Set the value in increments of 10.

GUARD TYPE (NORMAL, AUTO, NO GUARD)

When AUTO is selected, your character automatically guards against most attacks—no button pressing is needed (long-range attacks will still damage your character, however). Choose NORMAL and you need to use the controls in order to guard. If you are feeling really brave go for a match with NO GUARD selected; pressing the Guard Button won't get you out of trouble here.

CONTROL TYPE

Configure the game controls to your tastes with this option. Press the D-Pad UP or DOWN to highlight the control, and LEFT or RIGHT to assign a function. For a list of moves see pages 11–24.

CAMERA ACTION

Select the view of the game. Refer to the following list for a description of the views.

HIGH SIDE	Watch from above with this view
LOW SIDE	Get right up next to the combatants
BACK	Select the view from directly behind Player 1 or 2's fighter
FRONT	The focus is on Player 1 or 2's fighter

SOUND TYPE

Choose either Stereo or Mono (monaural) sound.

When finished with the Options, highlight EXIT and press Button A, B, C or Start to return to the Mode Select screen.

Options Help

Press Button Z on any Options screen to bring up the Options Help screen. This is a short explanation of some of the features of the Options screen.

How to Win...and Lose

Taking the Round

To win a match in *Toshinden URA* you need to win the number of rounds listed on the Options screen (see Set Point, page 6). Win a round in one of three ways: either beat your opponent until no life remains in the Life Bar, inflict more damage than you take by the time the Timer runs out, or knock your opponent out of the ring.

Fighting Moves and Special Attacks

The moves which you can use for any fighter are listed in Using the Fighter on pages 10–13. Refer to the fighter descriptions on pages 14–24 for Special Attacks unique to each fighter.

Overdrive and Secret Attacks

In addition to Special Attacks, fighters can perform very powerful Overdrive and Secret Attacks which can only be used at certain times of the game.

The Overdrive Bars appear at the bottom of the game screen. When contact occurs between fighters, the levels in the Bars rise. When the Bar is full and begins flashing, it's time to go after your opponent with the Overdrive Attack! Overdrive Attacks are designated by "(O)" and are listed on the character pages (pages 14–24).

In most fighting games, once your character's Life Bar starts flashing the end is near. Not so in *Toshinden URA*. The Secret Attack is your last chance to surprise your opponent right when you seem to be on the ropes. Secret Attacks are designated by "(SA)" and are listed on the character pages (14–24).

Pausing the Game

Press Start during gameplay to bring up the game's Pause screen. You then have three choices:

CONTINUE	To resume play (to continue on the Pause screen, Button A or C can also be pressed)
OPTION	To access the Options screen
RESET	To quit the match and return to the Title screen

Highlight an option by pressing the D-Pad UP or DOWN, and press Button A, C or Start to select.

Pause Options

All Options except LEVEL and SET POINT can be accessed with this screen. Refer to the Options screen on pages 6–7 for descriptions of options and an explanation of how to change settings.

When you select Reset

In the Confirmation Window select YES to return to the Title screen, or NO to return to the Pause screen. Highlight either by pressing the D-Pad UP or DOWN, and press Button A, B or C or Start to select.

Pause Help

Press Button Z while the game is paused to access the Pause Help screen. Character moves and Pause screen options are listed. When finished reviewing press Button Z to return to the main Pause screen.

Using the Fighter

These are the moves for all of the fighters in Toshinden. All of these instructions are for a character facing right. Reverse the instructions when your character is facing left.

Basic Moves

Press the D-Pad in the direction indicated to perform the following moves.

Key

Use this key for the following pages.

- Press the D-Pad in the direction indicated
- ⇒ Hold the D-Pad in the direction indicated
- R Press the listed button
- R Hold the listed button until the action is completed

Fighting Moves

On the Move

Quick Advance/Retreat

(→→/←←)

(DASH Button + D-Pad LEFT/RIGHT)

Your character moves a couple of steps in the direction you select. This is a good move to avoid attacks or get in position to attack at close range.

Rotation Moves

These moves are useful in avoiding attacks and getting to the side of your opponent. Perform them and follow up with the attack of your choice to catch your opponent off guard!

F Rotate

(F. ROTATE Button)

Your fighter performs a roll to the front of the screen.

B Rotate

(B. ROTATE Button)

Use this move to make your fighter roll towards the back of the screen.

A Rotate

(A. ROTATE Button)

The direction your fighter rolls depends on where he/she stands in relation to the other fighter.

Closing Rotation

Hold the D-Pad in the direction of your opponent while rolling to close in on him/her. This will work with any of the rotation moves listed above.

Full Run

(→→/←←)

(DASH Button + D-Pad LEFT/RIGHT)

Sprint towards or away from your opponent with Full Run. Like Quick Advance/Retreat you can get your fighter out of harm's way, only faster, or take your opponent by surprise by getting up in his/her face quickly!

Side Dash

→→/←← + Button R or L

(DASH Button + D-Pad LEFT/RIGHT, then Button R or L)

Move sideways in a hurry with Side Dash.

Taunt (Taunt Button)

Make your fighter mock the enemy with this move. When your fighter performs the Taunt, the enemy's Overdrive Bar is partially filled. This is just a little reminder to your enemy that he/she needs all the help available when up against you. The user must select Taunt on the Options screen. The Taunt button does not appear if the settings are in Default Mode.

On the Attack

H. Kick (B)

W. Kick (A)

Press Button B for a Hard Kick or Button A for a Weak Kick.

H. Slash (Y)

W. Slash (X)

These are the attacks the fighter performs with a weapon or by hand. Press Button Y for a Hard Slash or Button X for a Weak Slash.

Hard VS. Weak...

Why choose a Weak attack if a Hard attack does more damage? It's all in the timing. The Hard attack is stronger, but takes longer to perform, which might leave you open to a counterattack. Try out both types to discover when it's best to use the Hard and Weak attacks.

Close Range Attack (← + B or Y)

When within reach, perform this attack for a major blow that sends your opponent to the floor. Most of the fighters perform throws, though a couple of them have other nasty surprises in store.

Pounce

(X + A or N. DOWN Button for short distance pounce)
(Y + B or F. DOWN for long distance pounce)

Attack your opponent while he or she is down with this move. Use the short distance pounce for a quick attack when near your opponent, or the long distance pounce when farther away.

On Defense

Guard

(⇐)
(GUARD Button)
(For Crouching Guard, ↙)

When Knocked Down...

Your fighter will eventually get up off the ground if you do nothing, but you risk being attacked in the meantime. Use the following maneuvers to get clear of your opponent.

Roll to the Side (Button L or R)

While down, hold either the L or R Button, and your fighter will roll to the side.

Roll to or from Opponent (⇒ or ⇐)

Currently, Tracy spends her time surfing the net, looking for work and doing anything else that amuses her. She comes across the story of the "replicant warrior," created by a well-known Chinese scientist, and immediately knows this is the job to get her back on the police force. Tracy decides to search the streets first to find more about the replicant.

Little is known about the man the media now calls the Ripper. He is a prime suspect in the recent murders, if only because he has been seen stalking the streets and asking questions about other fighters.

Ripper prefers twin razor-sharp blades in combat, and despite his size, is an extremely fast fighter. His last battle with Eiji ended when Ripper wounded Eiji. Ripper has vowed to defeat the master swordsman in their next confrontation.

Ronron was the chief scientist for the Toshinhei Project, conducted by Interpol. This project aimed to create a replicant warrior for peace enforcement and anti-terrorist use.

Immediately following the project's completion, however, the replicant was stolen by Ronron's superior. Infuriated that the replicant she created was being used for evil purposes, she has decided to go look for the replicant and deactivate it.

Eiji finally met his missing brother Sho during the Toshinden Tournament, only to have Sho reject his offer to return home. Although Sho has disappeared again, Eiji is not so concerned with finding his brother this time, since he has found another objective - to defeat Ripper.

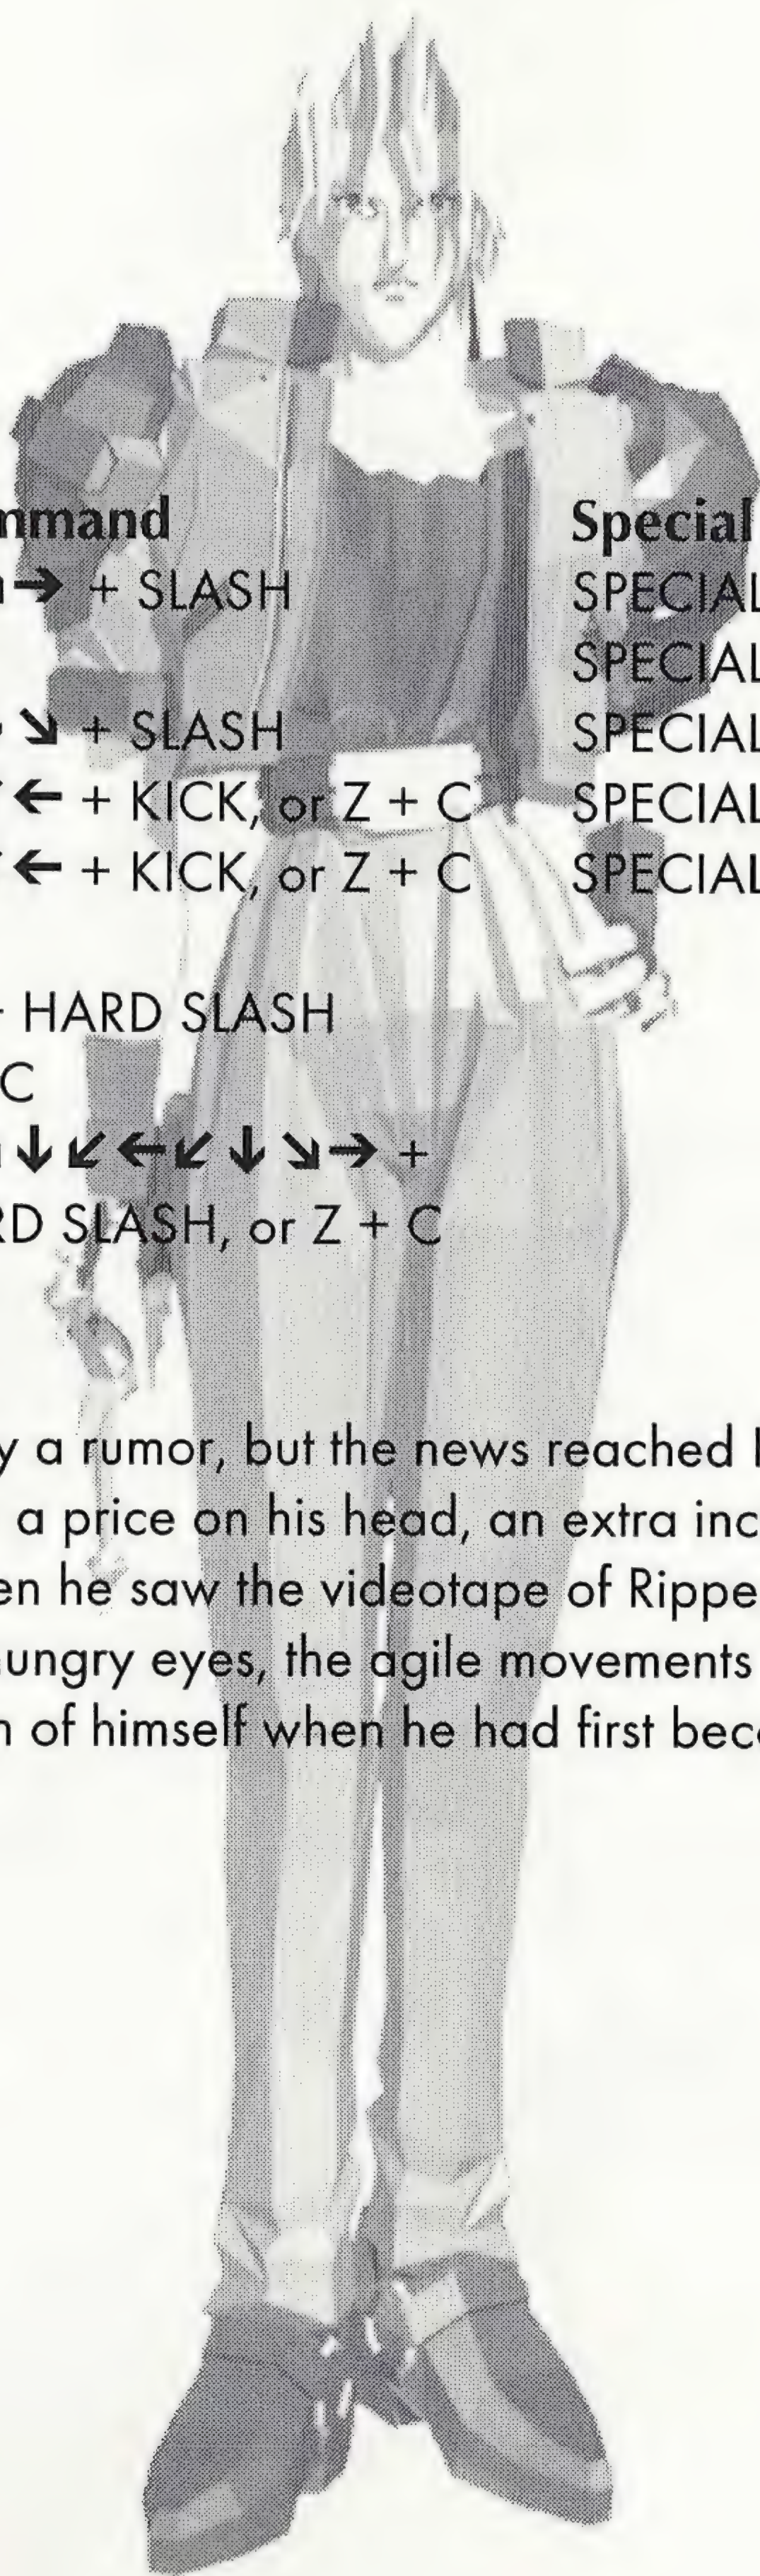

In his last fight with Ripper, Eiji held the advantage for most of the battle. But it ended when Rippers knives slashed Eiji, and Ripper stood over him saying, "Next time, I'll kill you."

But when he saw the videotape of Ripper, he clenched his fists. For those bright, hungry eyes, the agile movements and overall appearance reminded him of himself when he had first become a bounty hunter.

Ronron's not taking any chances with the replicant. A phone call here and a phone call there, and before long someone named Sofia is on her payroll.

Sofia looks forward to the new adventure. It wasn't hard to convince Ronron to pay for a new outfit and share some of that wonderful technology to build an even more lethal whip than the previous one. Anything to get her name out that she is the toughest fighter of all is well worth Sofia's time.

Sharpening his claws, Fo realizes he has found the world of his dreams. Yet there are always the foolish who attempt to restore order, and no doubt Fo will meet again those idiots he had to battle in the tournament. For if he is out here, why should they not be here too?

Mondo must obtain diagrams of the Toshinhei Project replicant and deliver them directly to the head of the clan, not his immediate superior. Again, Mondo notices the breach in protocol. How interesting, yet it is not for him to wonder. He begins to meditate in preparation for his most dangerous mission ever.

If you elect to have the repair done, you will need to return the defective merchandise, freight prepaid and insured against loss or damage, to Sega's Service Center with an enclosed check or money order payable to Sega of America, Inc., for the amount of the cost estimate provided to you by the technician. If, after inspection, it is determined that your compact disc cannot be repaired, it will be returned to you and your payment will be refunded.
